

Pigger Big Box Instructions

Farms with a centrally positioned feeding place are advised to use the most cost-effective Pigger Big Box. The Pigger Big Box can be used for automatic feeding systems or manually.

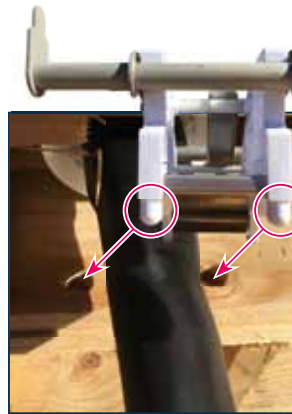

How to prepare the big box

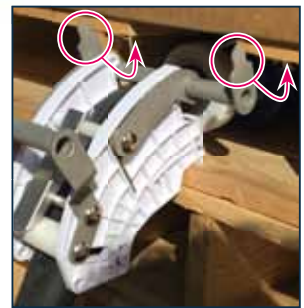

1. Pull the rubber hose out of the pallet and remove the red cap

2. Pull the hose through the tap

3. Insert the tap base pins in the pallet openings

4. Position the tap top pins in the pallet openings

5. Shut off the tap and, if needed, cut it near the tap connection

6. You will find the big box seal beneath the pallet

7. Put the blue key on top of the seal and turn the key down to open the seal

8. Open the tap to administer the milk
